DPS MATHURA ROAD · CLASS 7A | INTERACTIVE PRESENTATION PLAYBOOK | TOTAL RUN TIME: ~8 MINUTES

Vision 2040: DPS Mathura Road as a Smart School

"Less Heavy Bags. More Heavy Brain Power." — Complete 3-Speaker Script & Stage Playbook

STUDENT PRESENTATION TEAM

- 👑 **Manini Sharma** · Group Leader, Anchor & Vision Lead
- 🌟 **Maham** · Co-Presenter & Interactive Physics Demo Lead
- 🌟 **Fatima** · Co-Presenter & Campus Transformations Lead

HONORED MENTORS & TEACHERS

- 💻 **Poornima Ma'am** (Computer Science)
- ✨ **Deepti Ma'am · Usha Ma'am · Prableen Ma'am**

🎯 Why Do We Need This Website? What is the Purpose of This Project?

This project is not just a school assignment—it is a bold student vision linking our daily classroom life at DPS Mathura Road to India's upcoming national milestones.

1. Why a Live Website instead of PowerPoint?
Static slides cannot demonstrate 2D physics gravity, real-time before/after wipe sliders, or interactive blueprints. A website lets teachers and classmates **touch and experience** 2040 right on screen.

2. The 12kg Backpack Health Crisis
Middle schoolers carry up to 40% of their body weight in textbooks every day, leading to spinal deformities. Our proposal replaces this with a 320g shatterproof AR Slate holding all curriculum.

3. Delhi Smog & Clean-Air Bio-Dome
Every winter, toxic Delhi smog forces schools to shut for weeks. Our solar-powered bio-dome maintains positive-pressure HEPA air (AQI < 20), guaranteeing zero lost school days.

4. Empowering Teachers with AI Automation
AI doesn't replace teachers; it automates routine attendance, grading, and scheduling, giving our mentors 3 extra hours daily for 1-on-1 emotional connection and guidance.

👑 Manini Sharma

Group Leader & Primary Presenter

- **Leader Advantage:** Delivers opening hook, sets the vision, commands spotlight and pacing.
- Presents the 0.0kg Bagless AR Slate & AI Teacher Mentorship.
- Leads heartfelt gratitude to Poornima Ma'am & mentors; commands Q&A.

🌟 Maham

Interactive Physics & Health Lead

- Triggers the falling 12.4kg backpack gravity chamber live on screen.
- Controls the 2D physics sandbox (drags/flings the floating concept spheres).
- Explains the Delhi Clean-Air Bio-Dome solution.

🌟 Fatima

Transformations & Lab Lead

- Drives the interactive before/after wipe sliders comparing real photos.
- Highlights **Poornima Ma'am's Computer & AI Robotics Workcell**.
- Explains sports biomechanics with Usha Ma'am & science lab with Deepti Ma'am.

🎤 3 Golden Rules for Stage Delivery (Smart 7th Grader Tone)

1. **Eye Contact:** Look at Principal Ma'am & teachers in the front row, not at your shoes or the wall!
2. **Smooth Handoffs:** Manini passes smoothly to Maham and Fatima. Always smile when your teammate is speaking.
3. **Match Screen Actions:** Speak exactly when the click or slider movement happens so the audience is hooked.

🎬 Scene 1: The Dramatic Hook & Welcome

Website: #hero (Top of Page) | Time: 0:00 – 1:15

STAGE & SCREEN: Projector shows #hero. 3D paper plane glides smoothly. Manini stands center with clicker/mic. Maham on laptop trackpad. Fatima on right.

Manini — Leader Spotlight

[Standing tall, warm smile, speaking with confident, energetic clarity]

"Respected Principal Ma'am, our beloved teachers, and my dear friends—Good morning!
Let me ask you all one simple question: How many of you felt your shoulder ache when you picked up your school bag this morning? *(Pause for audience smiles and nods)*
Today in 2024, middle schoolers carry between 8 to 12 kilograms of books every day! But imagine walking through the gates of DPS Mathura Road in the year 2040... carrying zero heavy books, breathing pure filtered air even during Delhi winters, and commanding real robotic arms in our computer lab!
I am **Manini Sharma**, and alongside my brilliant teammates **Maham** and **Fatima** from **Class 7A**, we are thrilled to present: **Vision 2040 — DPS Mathura Road as a Smart School!**"

Maham

[Gestures to the screen] "And instead of making a standard slideshow that puts people to sleep, we built a fully interactive website so you can actually *touch, test, and experience* what our school will feel like in 2040!"

Fatima

[Points out teacher mentions on screen] "Every single innovation here was inspired by our teachers—especially our computer teacher **Poornima Ma'am**, **Deepti Ma'am**, **Usha Ma'am**, and **Prableen Ma'am**!"

🎬 Scene 2: The Big Picture & National Alignment

Website: Scroll to #why-2040 (Mission Manifesto) | Time: 1:15 – 2:15

STAGE & SCREEN: Maham scrolls smoothly to #why-2040. 3D paper plane curves across the screen. Four pillar cards illuminate.

Manini — Leader Spotlight

[Pacing clearly, visionary tone]

"Why 2040? In 2040, India's space program ISRO plans to land Indian astronauts on the Moon! And by 2047, India celebrates 100 years of independence with *Viksit Bharat*.
DPS Mathura Road has always nurtured national leaders. But our classrooms must evolve for that future. School shouldn't be about memorizing 300-page textbooks for paper exams. School should be about curiosity, solving climate challenges, and building real skills!"

Fatima

"That's why our website establishes four pillars: 1 Smog-Free Bio-Domes, 2 0.0kg Bagless AR Slates, 3 AI empowering our teachers, and 4 Live ISRO telemetry in science class."

🎬 Scene 3: Live Interactive Demo — Feel the Weight of Today

Website: #ph (Gravity Chamber) | Time: 2:15 – 3:30

STAGE & SCREEN: Maham clicks "🎒 Feel The Weight of Today". Heavy books, metal bottles, and registers crash down in the Matter.js gravity chamber.

Manini

"Now, let's look at our first live interactive simulation. Maham, show everyone what our spines feel every single morning!"

Maham — Live Demo Lead

[Clicks/taps trackpad as items crash down]

"Watch the screen! Look at that 12.4kg backpack crashing down! The heavy math guide, the science practical file, the steel bottle! Pediatric research shows 42% of middle schoolers suffer spine and shoulder pain because bags exceed 10% of their body weight.
Why are we carrying 12 kilograms of dead weight when the entire world's knowledge fits in a microchip?"

Manini — Leader Spotlight

[Holds hands as if presenting a sleek tablet]

"Our 2040 answer is the **320-gram DPS Academic AR Slate**! It eliminates heavy paper registers with adaptive digital testing. All textbooks, interactive simulations, and homework modules live on one shatterproof slate. When you leave home, your bag is practically weightless!"

🎬 Scene 4: 2D Physics Sandbox & The 8 Innovation Blueprints

Website: #physics-sandbox | Time: 3:30 – 4:45

STAGE & SCREEN: Maham grabs the bouncy floating concept spheres on screen, tossing and colliding them. Fatima points to the blueprint info drawer.

Maham — Live Demo Lead

[Grabs a sphere with cursor, flings it against the screen border]

"In this section, we built a real-time 2D physics sandbox using Matter.js! You can fling these 8 concept spheres around the screen.
Watch—I'm grabbing the green sphere for the **Delhi AQI Bio-Dome**. In winter, outdoor Delhi AQI climbs past 450. But inside our 2040 campus bio-dome, positive-pressure HEPA filters and solar canopies keep the air at AQI 18! Clear lungs, zero coughing, and zero cancelled school days!"

Fatima

[Clicks the blue Robotics sphere on screen]

"And when I click any sphere, like this blue one for **AI Robotics**, the full engineering blueprint pops up—detailing the exact problem, our solution, and its connection to India's national science missions!"

🎬 Scene 5: Real DPS Photos vs. 2040 Wipe Sliders

Website: #transformations (Facility 01 & 02) | Time: 4:45 – 6:15

STAGE & SCREEN: Fatima operates the trackpad. Smoothly slides the before/after wipe divider on Facility 02 (Computer Lab) and Facility 03 (Science Lab).

Fatima — Transformation Lead

[Slowly wipes the slider from left to right on screen]

"This is our favorite feature—the **Interactive Before-and-After Swipe Sliders**!
On the left is a real, authentic photograph of our school today. And when I drag this handle to the right—presto! You see our reimagined 2040 facility!
Look at Facility 02: **Computer & AI Robotics Lab**, inspired by our computer teacher **Poornima Ma'am**.
Today, we work on desktop towers learning basic word processing and typing. But by 2040, under Poornima Ma'am's guidance, students will write Python algorithms, simulate kinematics in CAD, and command real 6-axis articulated robot arms!"

Manini — Leader Spotlight

[Points proudly at the next facilities]

"And look at Facility 03: The **Frontier Science Lab** with Deepti Ma'am and Prableen Ma'am! Instead of staring at 2D textbook drawings, students do fruit DNA extraction and inspect living cells through 8K quantum digital microscopes.
Meanwhile in our sports arena, Usha Ma'am will use AI kinematic sensors to optimize athletic posture and prevent sports injuries!"

🎬 Scene 6: A Day in the Life of Class 7A in 2040

Website: #timeline-section | Time: 6:15 – 7:15

STAGE & SCREEN: Maham scrolls to timeline. The three presenters speak in crisp, synchronized relay style.

Manini "**07:30 AM:** We board the quiet electric DPS shuttle carrying only our 320g slate. No heavy bags!"

Maham "**08:15 AM:** Assembly under the Bio-Dome. Pristine air, AQI 18, clear breathing!"

Fatima "**01:00 PM:** AI Robotics & coding with our computer teacher Poornima Ma'am!"

Manini "**02:30 PM:** Smart swimming and athletic recovery in the solar pool with Usha Ma'am!"

🎬 Scene 7: Honoring Our Mentors & The Grand Finale

Website: #closing-section (Signature & Mentors) | Time: 7:15 – 8:15

STAGE & SCREEN: Scroll to bottom signature card showing Manini Sharma, Maham, and Fatima under Class 7A, with glowing teacher tribute chips.

Manini *[Heartfelt, sincere, smiling at teachers in the audience]*

Leader Spotlight

"People often ask: *'If schools use AI, will teachers be replaced?'* Our answer is an absolute **NO**! A smart school never replaces teachers. In fact, AI frees our teachers from routine paperwork so they have more time to mentor, inspire, and care for us.

We want to express our deepest gratitude to our computer teacher **Poornima Ma'am** for opening up our minds to coding and technology, and to **Deepti Ma'am**, **Usha Ma'am**, and **Prableen Ma'am**. You are the heart and soul of DPS Mathura Road!"

All Three *[In unison, stepping forward with bright smiles and a proud salute/bow]*

"The future isn't somewhere we go — it's something we build together!
Thank you, and Jai Hind!"

💡 Q&A Quick Reference for Manini, Maham & Fatima

Q: "Isn't a smart campus too expensive for a school to build?"
Manini answers: "Not at all, Ma'am! Our plan uses bifacial solar hyper-canopies producing 140% of the school's electricity, drastically cutting Delhi power bills. Plus, eliminating physical textbooks saves lakhs every year."

Q: "Won't students get distracted by games on their AR slates?"
Fatima answers: "Poornima Ma'am and Deepti Ma'am helped us address this: slates run on school-locked firmware with zero social media access and dedicated academic sandboxes."

Q: "How does this website work offline?"
Maham answers: "We built a self-contained offline bundle where all images, styles, and physics scripts are embedded, so it runs smoothly on any school laptop without internet!"
